Arbor Networks ATLAS®

ATLAS is a collaborative project between Arbor Networks, the security division of NETSCOUT, and 400 service provider customers who have agreed to share anonymous traffic data with us. ATLAS delivers a truly comprehensive view into internet traffic, trends and threats. From this unique vantage point, Arbor is ideally positioned to deliver intelligence about botnets, DDoS attacks and malware that threaten internet infrastructure and network availability.

DECEMBER 2017

Total Number of DDoS Attacks

131,000

Total Attacks

4,225 Per Day

176 Per Hour

2.9 Per Minute

PREVIOUS SIX MONTHS

Top Sources of Attacks

Percentage of attacks from the top four source countries targeting the United States.

- 36.90% United States
- 21.77% Canada
- 20.66% Brazil
- 20.66% United Kingdom

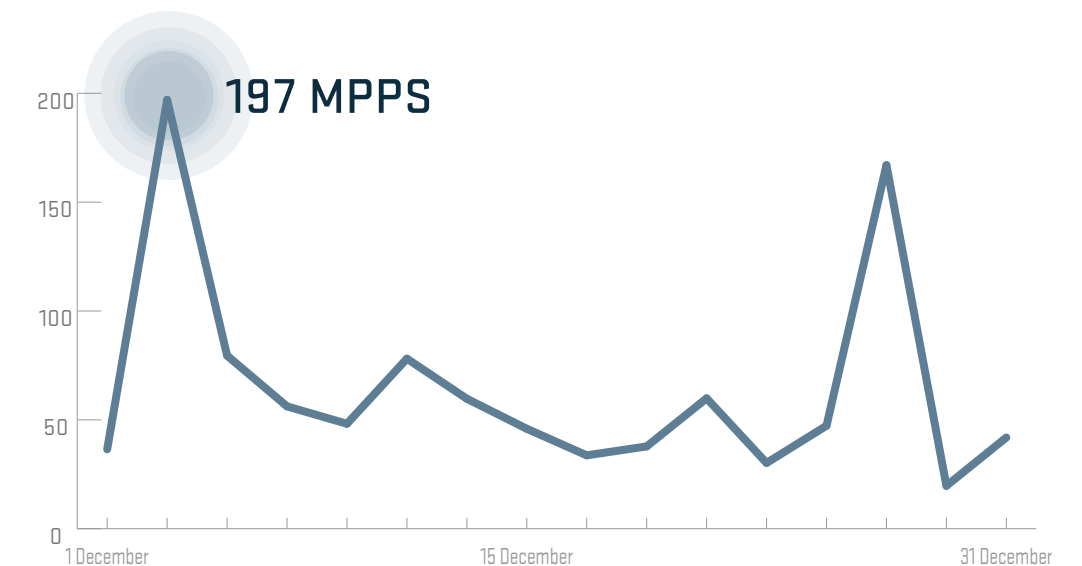

Largest Gbps Attack

BPS (bits per second) represents the volume of the attack that is attempting to saturate link capacity.

Largest PPS Attack

PPS (packets per second) is the throughput of an attack targeting Firewalls, IPS and Load Balancers. This is why on-premise DDoS protection is critical.
